

# If...

- ✓ You've given out your SSN to *anyone* in the past 6 months...
- ✓ You belong to *any* church or organization...
- ✓ You hold 50% or more of your assets in *any* U.S. bank...

## You're an Easy Target for Unjust Lawsuits, Asset Forfeitures and Identity Theft

### I'll Show You 109 Ways to Protect Your Privacy and Property Rights - and Secure Your Wealth - Using the Secrets of the United States Witness Protection Program...

Dear Fellow Privacy Seeker,

Loretta Wiley, an 88-year-old woman, lent her teenage grandnephew - Willard - \$18,000 to buy a used Chrysler.

After a night of drinking and partying, Willard drove the car off a railroad bridge, totaling the Chrysler.

His passenger and fellow party-goer, Mark Varjak, lost a leg in the accident and was paralyzed from the chest down.

Despite his reckless behavior, Willard was NOT prosecuted...

Yet three years later, a jury found Ms. Loretta Wiley. liable...to the Varjak family to the tune of \$950,000 in damages - her entire life savings!

- Ms. Wiley did not purchase the car.
- She did not co-sign for the car.
- Her "crime" was simply *lending* her grandnephew money to buy the car.

If *only* she'd taken a few simple steps to protect her wealth before Willard got into that accident, she could have lived out her life in relative comfort and peace.

Ms. Wiley is not alone...

## Professional Wealth Leeches Know How to Manipulate the System... And Make Off With Your Life Savings

There are thousands of documented cases in which U.S. courts have ruled against unsuspecting individuals in favor of opportunists seeking to profit from "loopholes" in the legal system.

And individuals who are at or near retirement bear the greatest risk of attack. That's because professional wealth leeches know that's when you're likely to have accumulated the greatest amount of wealth.

No matter what your age or income, in today's digital society, you're an easy target for identity theft scams, lawsuits and asset forfeitures.

Yet, as I'll show you in this letter, there are 109 strategies you can use to protect yourself from identity theft and government bureaucrats...and to keep your wealth safe from prying eyes, contingency lawyers and unjust lawsuits.

Introducing...

## **Secrets of the Witness Protection Program - 109 Ways to Lower Your Risk to Identity Thefts, Unjust Lawsuits and Asset Forfeitures**

I'm Mark Nestmann. I've worked with *The Sovereign Society* since it was founded almost 10 years ago...helping its subscribers shield their wealth from lawsuits, scams, civil forfeitures, unnecessary taxes and privacy risks.

Earlier in my career, I spent 20 years as an investigative journalist - during which time, I witnessed more attacks on people's wealth and privacy than I care to mention.

It taught me a thing or two about how privacy works in the U.S. Government - how you can lose it, and certain "deep-cover" techniques you can use to keep your financial and personal affairs private. Like the U.S. Marshals Service, which holds the responsibility for protecting - and often hiding or assigning a new identity to - key witnesses in important government cases.

A couple of years ago, it occurred to me...

If the **U.S. Marshals Service** uses these techniques to provide *"or the security, health and safety of government witnesses - and their immediate dependents - whose lives are in danger as a result of their testimony against drug traffickers, terrorists, organized crime members and other major criminals"*..

Could they work for anyone? The answer is yes.

You can effectively shut out privacy invaders using many of the same techniques persons enrolled in government-sponsored witness protection programs are advised to follow. In fact, you might be surprised to discover how easily you could implement these strategies in your own life...and how much they could save you. It's literally the secret code that can ensure your safety, and protect everything you hold dear.

It's all detailed in my new special report called *Secrets of the Witness Protection Program*. It shows you, step-by-step, 109 strategies you can use to lower your profile to identity thieves, shield you from unjust lawsuits and protect you from asset forfeitures.

### **Like It or Not - Your Life Is an Open Book**

I don't mean to alarm you - but the information I've uncovered is frightening. The truth is, just about everything you might want to keep private - details of your bank accounts...your phone records...medical records...credit reports...your Social Security number...can be viewed by *anyone*, anytime, for "the right price."

***Privacy invaders can purchase your phone records for US\$200...Your Social Security number for US\$60...***

The problem is out of control...and the costs are astronomical for unsuspecting people like Loretta Wiley who get "caught" in snares they never would have imagined existed...

- **An estimated 40 million lawsuits are filed every year...**and the number keeps growing. Opportunists make careers out of filing lawsuits, knowing that the expense of defending against these attacks is so high, a settlement will likely be offered.
- **Identity theft is the fastest-growing crime in America.** In 2005, at least 130 reported security breaches exposed more than 55 million Americans to potential ID theft. In 2006, more than 30 million Americans have had their personal data potentially exposed to identity thieves - in just the past 4 weeks!
- The Supreme Court has ruled that neither your local nor your long-distance calling records are considered confidential - and have *no "expectancy of privacy."*
- In June of 2006, Congress learned that law enforcement agencies - including the FBI and the Department of Homeland Security - use data broker services *to evade the 1970s-era laws set up to protect your civil liberties.*
- Right now, as I write to you, your bank is spying on you on behalf of the federal government. *Any "suspicious transactions" you make - as required by the Bank Secrecy Act (amended by the USA Patriot Act) will be reported to FinCEN, the Treasury Department's "financial intelligence unit."*

In **Secrets of the Witness Protection Program**, I break down each of these threats and give you the solutions that can help you avoid substantial losses. It all starts with protecting the 9-digit number that could ruin your life...

**The "Safety Net" That Was Supposed To Protect You Is Now The #1 Threat To Your Financial Security Today**

When the U.S. government first issued Social Security numbers in 1936, it assured the public that the numbers would be used solely for Social Security programs.

Today, however, the SSN has become a de-facto national identifier. And increasingly, a major threat to your wealth...

- People who obtain your SSN may impersonate you and steal your identity.
- They may obtain your credit report

**I.D. Thefts Spiraling Out of Control in 2006...**

Identity theft is the fastest-growing crime in America today. In just the last 5 weeks, more than 30 million Americans have had their personal data potentially exposed to identity thieves resulting from computer theft or hackers invading supposedly "protected" databases:

**May 22, 2006:** 26.5 million military identities exposed when a laptop was stolen from a U.S. Veterans' Administration employees' home.

**June 1, 2006:** 1.3 million customers exposed. The Texas Guaranteed Student Loan company announced that 1.3 million customers were at risk of ID fraud after a contractor lost unspecified "computer equipment."

**June 6, 2006:** 72,000 identities exposed. Officials with Ohio's Buckeye Community Health Plan notified authorities that four computers were stolen... containing 72,000 Medicaid subscribers' personal information.

and information about your bank and brokerage accounts by phone.

- If *they* have poor credit, they may use *your* SSN to apply for credit.

But people can't misuse your SSN if you don't give it to them...

Most businesses will request your SSN in such a way that you're led to believe you must provide it. Yet as I'll show you, only a few businesses are legally obligated to ask for it.

**June 8, 2006:** 65,000 identities exposed. The YMCA announced that a laptop stolen from an office in Providence, R.I. held credit card and SSN's, checking account data and names, addresses and medical information.

**June 18, 2006:** 970,000 identities exposed. Insurance giant AIG announced that it lost personal information of about 970,000 consumers after a burglary in Midwest.

The statistics are grim. Yet as you'll discover in **Secrets of the Witness Protection Program**, there are at least 109 steps you can take to minimize your disclosure to identity thefts and to protect your wealth...

There's even a technique you can use to get what you want without revealing your SSN.

Limiting the number of people who have your SSN will limit your exposure to identity thieves. But that's not all you need to protect your privacy...

## **How to Protect Your Home and Everything in It - From Surveillance, Robbery, Lawsuit and Forfeiture**

Your home and everything in it is vulnerable to surveillance and burglars. "Bugs" can be installed anywhere in your home by anyone who has a few seconds of unsupervised access to it. Wiretaps can be installed on your telephone in a matter of minutes.

And forget about the protection of the law. In many cases, which I'll share in great detail in my report, the law seems like it's on the side of those who would steal from you!

- If you loan a vehicle to a friend who injures someone or damages his property, you can be sued.
- If you lend money to someone to purchase a vehicle, you may be responsible for any damages or injuries that person causes in an accident.
- If a guest in your home does something illegal during their stay, your property can be seized. And you're not innocent until proven guilty in such cases...rather, it's up to you to prove your innocence, or lose your property!

In **Secrets of the Witness Protection Program**, you'll learn 20 such ways to avoid ridiculous legal stipulations, and keep your home...even your vehicle, safe from surveillance, robbery, lawsuits and forfeiture proceedings.

- 3 simple "precautions" to take every time you invite friends over for dinner - and the one thing you should never do. Just 5 minutes and the evening is yours to enjoy...free from the worry of a potential injury or lawsuit. (Page 6)
- How to qualify for - and prevail in a potential civil forfeiture defense - under the provisions of a special, easy-to-obtain, home owner status...that protects you against unlawful use of your property without your knowledge. (Page 7)

## **A Shocking Revelation about Your Phone Records - Upheld by the U.S. Supreme Court!**

Your phone calls and records are much *less* private than you might think.

According to the U.S. Supreme Court, neither local nor long-distance calling records are considered confidential - and have NO "expectancy of privacy."

- **Don't assume any phone call is confidential.** Local and long-distance phone companies can legally monitor *any* telephone conversation. Connecting a wiretap requires only a voice-activated tape recorder and a few dollars worth of electronics. Wiretaps are virtually undetectable and produce no noise on the line.
- **Be aware of the limitations of unlisted numbers.** Local phone companies maintain directories of unlisted numbers - including reverse directories of such numbers - which are available to creditors and law enforcement. And to private investigators "for the right price."
- **Data brokers are on the prowl.** Hundreds of Web-based information brokers offer the complete record of outgoing and incoming phone calls for particular phone numbers for as little as \$100.

In **Secrets of the Witness Protection Program**, you'll discover the 15 deep-cover techniques to minimize your risk of monitoring and make sure your private phone calls remain private.

- Discover the 3 common mistakes most people make that can expose your personal calling records to potential privacy invaders...and the 3 steps you can take to eliminate such risks. (Page 13)
- Get yourself off reverse directories - a listing of telephone numbers corresponding to physical addresses that makes you a sitting duck for would-be thieves. National reverse directories are available on CD-ROM and are constantly updated...but you don't have to be on them! (Page 14)
- How to defeat caller ID and Automatic Number Identification (ANI) in less than 5 seconds. Simply push these 3 buttons on your phone to block your number from open view and to protect against prying eyes. (Page 14)
- Some pay phones, particularly in airports and hotels, are monitored. To minimize the risk of monitoring - and for added privacy - carry one of these. (Page 13)
- Find out the 3 best ways to discourage information brokers from selling your phone records, and more!

But, as you'll discover...

## **When It Comes to Your Medical Records - Not Even Your Doctor Can Stop the Feds from Accessing Your Files**

The common-law privilege of confidentiality between you and your doctor has disappeared. In fact, the very form you sign when you go to the doctor - the one they say ensures your privacy - is actually taking

it away!

The truth is, the U.S. government has given itself the right to access any aspect of your medical treatment or files.

Under federal law, health care providers are required to provide copies of your medical records upon the request of police, credit bureaus, insurance companies and federal agencies without your notification or consent.

I'll show you the *only* way to prevent this from happening. Plus, how you can...

- Save premium dollars and minimize disclosure of sensitive medical documents by carrying one of these. (Page 16)
- Prevent your insurance company from building a file of minor ailments - potentially making you uninsurable if you change insurance carriers. (Page 16)
- Submit a special type of application without advance payment, if you think you might be turned down for insurance coverage. (Page 16)

And of course, the most desirable path of access to your private information doesn't lead to your medical history...or to your phone calls...but rather, aims straight for your wealth...

### **How Opportunists Find Out You're Worth Suing**

Your bank, brokerage and credit card transactions provide a remarkably detailed account of who you are, what you own - and even your opinions, interests, ideology and religion. These records may be subpoenaed in a lawsuit or released in a criminal investigation.

- The **Bank Secrecy Act**, as amended by the USA Patriot Act, requires banks and brokerages to spy on their customers on behalf of the federal government.
- Such "financial institutions" **MUST** report *any* suspicion of *any* violation of state, federal or foreign law to **FinCEN**...the Treasury Department's "financial intelligence unit."
- If they don't spy on you, their licenses may be revoked and their employees and officers fined and imprisoned.
- Your bank is not liable for thefts from safety deposit boxes unless they are "grossly negligent" - an almost impossible standard to prove in court.
- In a civil forfeiture proceeding, the government can seize valuable items from your safety deposit box and force you to prove that they are not connected with any crime.

In my report, *Secrets of the Witness Protection Program*, I'll show you 10 ways to protect against unauthorized access to your bank, brokerage and credit card accounts.

I'll also give you 10 examples of "suspicious transactions" people make that can draw unwanted attention to your bank activity...and give the government an excuse to investigate you, seize your accounts, and even throw you in jail.

And if you rely on your computer to safe-house your financial information, you're at an even greater risk of privacy attacks...

## **How to Prevent Hackers from Stealing Your Identity - Via Your Computer**

Computers are valuable digital assistants. But they may also contain sensitive information about your finances, spending habits and personal life. In the wrong hands, these little facts could not only embarrass you...but could be used against you in court.

In *Secrets of the Witness Protection Program*, I'll show you...

- How to thwart hackers from gaining unauthorized use of your computer...(p. 20)
- A simple three-step system to make sure you dodge unwanted email surveillance...and the best protection against your employer's attempts to play Big Brother on all of your daily correspondence...(p. 22)
- How to keep your Internet browsing and email correspondence private from government snoops who - under the PATRIOT ACT - now have the authority to obtain your records, without a warrant...(page 21)

I'll even give you the name of a state-of-the-art, virtually unbreakable encryption program - and tell you where you can go to download it - FREE! (You'll find the web address on page 20.)

But that's not all...

## **How to Protect Your Wealth from the Most Massive Privacy Invader in US History!**

Congress has given the IRS authority to demand financial records without a warrant from virtually every financial institution - and in doing so, has created the most massive privacy monster ever to exist.

- The IRS uses an enormous surveillance and data infrastructure to collect and administer your taxes.
- Tax return data combined with intelligence available through FinCEN and other databases make possible the creation of detailed dossiers on *every* U.S. taxpayer.
- In addition, the IRS has the power to seize your property and income *without* a court order or jury trial.

Yet, as I'll show you in *Secrets of the Witness Protection Program*, there are steps you can take to minimize disclosure of your financial affairs to the IRS and protect your wealth - while avoiding all the pitfalls.

- How to itemize your deductions when filing a tax return without revealing too many private details of your financial affairs...and why you should consider taking the standard deduction. (Page 23)
- Why you should never give *anyone* a signed, undated copy of the one form that gives the IRS permission to release tax return information to employers and credit grantors.

(Page 24)

- What you need to know about the limits of taxpayer-advisor confidentiality and the legal privilege of non-disclosure (Page 23)...and more.

### **The Effects Are Real...And the Toll They're Taking On Your Wealth Is Enormous**

Remember Ms. Loretta Wiley, the 88-year-old woman I told you about at the beginning of this letter?

Had she known *she* could be held liable for any damages her grandnephew caused in an accident - simply by *lending* him the money to buy the car - she could have taken a few simple steps to protect her wealth.

Had she read my report, *Secrets of the Witness Protection Program*, she would have known the risks - and the devastating effects - loaning her grandnephew that money could have on her own wealth...*saving her \$950,000 in damages.*

How many legal loopholes might you be vulnerable to?

### **109 of the Most Powerful, Wealth-Saving and Privacy-Protecting Strategies - Now Available for One Low Price!**

Now, only you know how many hundreds of thousands of dollars *you* could save - and how much better you'll sleep knowing you've done all the little things to protect yourself from frivolous lawsuits, asset forfeitures and identity theft.

Any one of the 109 wealth-protecting techniques you'll learn about in *Secrets of the Witness Protection Program* could be the one that saves you from losing your home, your car, your retirement savings - or worse, your identity.

They're ALL potential lifesavers! Yet when you order today, you'll pay just \$29.95 for every last one of them. That's less than \$0.27 per strategy...a small price to pay for solutions to such a big and potentially costly problem.

As with all Sovereign Society products, your satisfaction is 100% guaranteed. Order it...look it over...read through it...and if you don't think it fits your needs, simply let us know and we'll refund your money.

But truthfully, I think you'll be amazed not only by alarming information in this report, but by the practical and simple solutions that you can start using immediately to protect yourself and your family.

To claim your copy of *Secrets of the Witness Protection Program* for only \$29.95 - and to learn 109 strategies you can use to protect your wealth and privacy in today's most uncertain times, click "order now."

Rest Easy,

Mark Nestmann

P.S. The privacy attacks just keep on coming...Recently, CNET News reported that "the FBI has drafted sweeping legislation that would require Internet service providers to create wiretapping hubs for police surveillance and force makers of networking gear to build in backdoors for eavesdropping." There's no reason to believe the US government will resume protecting *your civil liberties* any time soon. To learn 109 ways you can SHUT OUT privacy invaders and professional wealth leeches from your life - and to order *Secrets of the Witness Protection Program...*

A rectangular button with a blue gradient background and the text "Order Now" in white, centered on the page.
